Her pick: Firenze Collection
by Juliska

What is your perfect purchase?

The charger and cocktail plates from the Firenze Collection by Juliska are extremely beautiful and would make any kind of food look appetising. We always tend to opt for serveware and dinnerware in mundane colours but this particular series in all its blue-ness is so refreshing.

Why does blue attract you?

It's versatile and matches with grey, silver, gold, red, pink...I can go on and on. But my favourite combination would be teaming it with white or yellow. It can be used in any room, on any day and for any occasion.

A design era that appeals to you...

It has to be Victorian. No matter how contemporary a space, adding one element in this style instantly boosts character.

The most unique makeover idea you've implemented...

I once used one of my grandmother's silk saris to create a series of cushions for a boring couch. No two pillows looked the same but they still complemented each other well.

DID YOU KNOW? Blue in its warmer tones is ideal for social spaces like the living room and the dining area
